

Supportive Living Services

Each staff member at ASI is an important component in our provision of “housing with care.”

“When all else fails and I have nowhere else to turn, I call my site manager to see if she has any ideas, and she always does. Nobody else has done that for me, not state social workers, not actual advocates for the state and/or city, not doctors.

Whether it’s a word of encouragement or [help obtaining] wheelchair batteries that make you feel like a kid on Christmas morning, my site manager does it. She is amazing.”

—An ASI Nevada consumer

For many Accessible Space, Inc. (ASI) consumers, an accessible, affordable home is only “part one” of independent living. An essential “part two” is having access to supportive services. Since ASI’s founding in 1978, the availability of 24/7/365 services has been integral. Residents schedule and manage their own service and always have the assurance of onsite service. The personal requirements are as varied as the clientele.

In various locations around the country, ASI provides access to services on a 24/7/365 basis to meet the individual needs of consumers with mobility impairments and/or brain injuries, as well as seniors.

Accessible Space employs individuals who possess tenacity, listening skills, patience, efficiency, and deep humanity. Our accessible, affordable buildings may be the most visible sign of ASI’s success in fulfilling our mission, but our staff—Site Supervisors, Resident Assistants, office professionals, and others—make it possible.

Minnesota Assisted Living Services

Residents have 24/7/365 access to onsite Resident Assistant staff and direct their own services such as help with daily living activities, housekeeping, meal preparation, behavioral supports, socialization, and service coordination. Services are provided in 100% accessible, affordable apartments and residential homes throughout the state. A nurse supervises services and works with the resident to develop an individualized services plan. A Site Supervisor also works with the nurse and residents to coordinate staffing schedules and implement the services plan. Specific sites are targeted to provide support for residents living with brain injury.

Minnesota Shared Living Program (SLP)

SLP provides an excellent alternative to institutional housing for individuals with a brain injury who require adult foster care. Residents have access to onsite staff 24/7/365. They work one-on-one with Site Supervisors to set personal goals and plan strategies for achievement. Services may include assistance with personal cares, help with cooking and cleaning and guidance in behavior and socialization. These

individual services are provided in six accessible, affordable homes in the Twin Cities Metropolitan Area.

Minnesota Independent Living Services (ILS)

Consumers receive help reaching their highest level of independence through personalized life skills training. ILS staff work one-on-one with consumers to provide in-home as well as community support in order to achieve individual goals and promote independent living.

Montana Personal Care Services

Residents have 24/7/365 access to onsite Resident Assistant staff at Southwinds Apartments in Great Falls, Montana. Residents direct their own services, and Site Supervisors work with the residents to coordinate staffing schedules plus implement the plan of care that meets the needs of the resident.

Nevada Community Enrichment Program (NCEP)

NCEP, a program of ASI, provides a continuum of services for individuals with acquired brain injury, traumatic brain injury, and neurological impairments in Las Vegas, Nevada. NCEP is the only nonprofit, post-acute brain injury rehabilitation center in Nevada. NCEP's services include intensive day treatment rehabilitation, residential rehabilitation, and life skills training. With accreditation from the Commission on Accreditation for Rehabilitation Facilities (CARF), NCEP provides outpatient brain injury rehabilitation for adults, children, and adolescents; residential brain injury rehabilitation; and vocational brain injury rehabilitation. NCEP is also the contract provider for the Regional Transportation Commission of Southern Nevada's Functional Ability Assessments, conducting over 2,300 assessments a year and determining the eligibility of individuals with disabilities who apply for Paratransit Services (door-to-door public transportation). NCEP is a leader in the field of brain injury rehabilitation, providing comprehensive services to Nevadans of all incomes since 1992.

Nevada Supportive Housing Services (NSHS)

NSHS enables very low-income individuals who have a physical disability and/or brain injury to live independently with 24/7/365 shared supportive living services. Services

are provided in 100% accessible, affordable apartments and residential settings. This program is open to eligible consumers in Las Vegas, Clark County, and Carson City, Nevada.
