

Services and Programs offered through Accessible Space, Inc. (ASI)

ASI supports individuals in their residential home through **Customized Living Services (CLS)** in the Twin Cities Metropolitan Area and Grand Rapids, Minnesota. The **residential settings** are six-bedroom homes (Camden, 28th Street) and an eight-bedroom home (Moses Residence) that have two side-by-side shared spaces, where each side of the home has three or four bedrooms. In addition to the bedrooms on each side, they each share a bathroom (with roll-in shower), kitchen and living room. These homes are completely accessible and additional accommodations can be added if needed in each of the bedrooms and/or bathrooms. All homes have 24-hour awake staff available to all residents through ASI's Comprehensive Home Care licenses.

Integrated Community Supports (ICS)

The **apartment settings** (Bostrom Terrace Apartments, Evergreen Apartments, Mounds View Gables, Pine Grove Apartments, Roselawn Village Apartments, Superior View Apartments, Thorndale Apartments and Valley Apartments) are fully accessible apartment buildings/units that include access to the 24-hour wake staff to residents who need support with activities of daily living. Residents also have access to community integration and other support services to help maintain and enhance their ability to live as independently as possible. In 2021, 115,131 care hours were provided by ASI's Direct Support Professionals (DSPs). Contract services provided 26,981 hours.

Visit www.accessiblespace.org for more information and to apply for services and/or housing.

Accessible Space, Inc. also offers supportive services to adults with mobility impairments and brain injuries in **Community Residential Services (CRS)** settings. Homes are located in Falcon Heights, St. Anthony, Blaine, Coon Rapids and White Bear Lake. The six homes provide 24-hour awake staff; each individual has their own room to decorate; and residents share an accessible bathroom, kitchen, living room and dining area.

Nevada Supportive Housing Services (NSHS) Individuals who receive our services will achieve the greatest independence and integration into the communities where they live and work. Instruction and coaching in home management and personal hygiene skills, money management, and skills in using public transportation are offered to direct individuals toward their greatest independence. In 2021, 75 residents at 10 locations received 74,218 care hours provided by ASI's DSPs.

Visit www.accessiblespace.org for more information and to apply for services and/or housing.

Nevada Community Enrichment Program

(NCEP) is a highly recognized leader in the field of brain injury rehabilitation. It's the only nonprofit, post acute comprehensive brain injury rehabilitation program in Nevada serving individuals with acquired and traumatic brain injuries (ABI and TBI), as well as neurological impairments and spinal cord injuries.

Basic admission criteria to NCEP's neuro program includes a diagnosis of traumatic or acquired brain injury, spinal cord injury, or other neurological condition; medical stability; ability to voluntarily and actively participate in a minimum of three hours of rehabilitation per day. NCEP's goal is to ensure that all rehabilitation is client-centered and driven, so that each individual may reach their highest level of independence. Maximum independence, as well as continual opportunities to progress, is made possible through NCEP's team approach to individualized treatment plans and educational programs focusing on brain injury education, awareness and prevention; for the clients, their support systems and the community. In 2021, 74,218 care hours were provided by ASI's DSPs through NCEP.

NCEP's Comprehensive Cardiac Rehabilitation Program at its location in Las Vegas, Nevada helps patients with heart conditions prevent recurrent cardiovascular events, resume their normal activities and reduce the likelihood of hospital re-admittances.

Opened in 2021 this program design achieves and expands the high level of rehabilitative care provided through NCEP's Brain Injury Rehabilitation Program.
